Regarding the proposed solar project, we have sufficient water supply to meet town requirements for the project.

Hi Bill,

I hope you're well!

Just checking in to confirm if you'll be able to review our project this week.

Best,

Nate

Greetings

As followup to our discussion today, there are a couple of things I need to look into. Nothing major and I do not foresee any issues, but will get back to you by end of week.

Thanks

Bill

Hi Bill,

I hope you had a great weekend. Writing a quick note to see if you had any questions, and to see if you could write back today with confirmation (we're shooting to submit to the planning board by the end of the day).

Best,

Nate

Hi Chief Pressey,

As discussed, we are submitting a site plan review application to the Town of Starks for an ~11 acre solar array. Please find our site plans attached.

As part of the application, we're required to provide written confirmation from you that there is adequate access to water at the project site for fire protection. Based on our discussion last week, it sounds like the Town trucks in water for fires, so I wouldn't expect there would be an issue there – our array will be served by a gravel access road designed to accommodate emergency vehicles.

Would you mind reviewing the site plans, and if all looks OK, confirming that there is adequate access to water?

Best,

Nate
