Overview

The information provided in this proposal is a preliminary estimate for illustration purposes only. This proposal is based on estimates and assumptions that may or may not be realized, and does not provide any guarantees regarding the actual system production, savings, utility rate, or any other data. This proposal is not a bid for work, an offer for financing, nor a binding agreement.

Energy Usage

The information provided in this proposal is a preliminary estimate for illustration purposes only. This proposal is based on estimates and assumptions that may or may not be realized, and does not provide any guarantees regarding the actual system production, savings, utility rate, or any other data. This proposal is not a bid for work, an offer for financing, nor a binding agreement.

System Design

The system design may change based on a detailed engineering site audit. A solar power system is customized for your home, so its pricing, savings and system production will vary based on a number of factors, including, but not limited to, final design, system size and configuration, utility rates, household energy usage, weather, shading from growing trees, damage to system components, applicable rebates, tax benefits, and the fluctuation of the price of electricity in your utility district. Nothing contained in this proposal is a guarantee of offset against current and/or future energy costs which may vary depending on usage(s) and/or other individual factors related to the system and home. Utility payments will vary based on local rates and rate changes. Local rates are subject to change.

Environmental Impact

The information provided in this proposal is a preliminary estimate for illustration purposes only. This proposal is based on estimates and assumptions that may or may not be realized, and does not provide any guarantees regarding the actual system production, savings, utility rate, or any other data. This proposal is not a bid for work, an offer for financing, nor a binding agreement.

Financing

The installer does not provide tax or legal advice. Any rebate, tax credits and/or incentives referenced in this proposal, if any, are for illustrative purposes and are not a guarantee of applicability and are not tax advice. You should consult your tax advisor to determine whether you are eligible for tax benefits and for more information. This proposal is not an approval for a loan. You must apply a loan directly with the lender. All financing terms provided in this proposal, including, but not limited to, loan amount and interest rate, are estimates and the actual amounts subject to change and approval by the financing provider. Actual available financing terms and rates may vary and are not available in all locations.

If your utility company does not offer net metering, for each kWh of solar electricity produced and exported to the utility grid, you may be credited at a rate set by your utility company. While this rate may fluctuate from time to time, it is generally lower than the normal retail rate that you would pay to purchase that same kWh back from the utility.

Bill Overview

If your utility company does not offer net metering, for each kWh of solar electricity produced and exported to the utility grid, you may be credited at a rate set by your utility company. While this rate may fluctuate from time to time, it is generally lower than the normal retail rate that you would pay to purchase that same kWh back from the utility.
